UI/UX Product Designer with 3 years of experience designing visually appealing and user-friendly interfaces for web applications in fast-paced product environments. Specialising in complex B2B enterprise workflows, data heavy high-density dashboards, and decision-support tools for operational teams. Solved complex business and user experience challenges by translating stakeholder requirements into intuitive product solutions. Proficient in Figma and Canva, with a strong focus on human-centred design principles, visual storytelling, and intuitive user experiences. Experienced in conducting user research, developing wireframes and high-fidelity prototypes, and collaborating with cross-functional teams to deliver responsive, interactive designs that meet business requirements.

Key Projects

Enterprise Analytics Dashboard — Web Application

- Designed visually appealing and user-friendly interfaces for an enterprise transformation dashboard, enabling executives to track KPIs, risks, milestones, and programme performance delivered across both web and mobile-responsive layouts.
- Developed wireframes, interactive prototypes, and high-fidelity designs in Figma (components, auto-layout, variables), iterating rapidly based on user feedback and stakeholder inputs to improve design quality and consistency.
- Applied visual storytelling and human-centred design principles to transform complex data into intuitive, navigable dashboards improving executive visibility and decision-making speed by 40%.
- Used Canva and Figma Make alongside AI tools to explore visual design directions and generate UI concepts quickly, reducing design turnaround time by 30%. Explore the prototype here: [Track360 Prototype](#)

Launch Analytics Dashboard — Power BI Dashboard

- Designed healthcare and pharmaceutical analytics experiences supporting data-driven decision-making and operational workflows., role-based workflow interfaces for operational and cross-functional teams, reducing task completion effort by 25% also aided in monitoring KPIs and execution metrics through a unified web application.
- Conducted user research and usability testing simulated stakeholder and end-user perspectives, validated persona-specific needs, and translated research findings into informed design decisions that reduced discovery effort by 25%.
- Created interactive prototypes and high-fidelity mockups using Figma, ensuring design consistency across multiple screens and user flows while adhering to UX best practices.
- Collaborated with cross-functional teams (business, analytics, engineering) to ensure design consistency and quality throughout development incorporating feedback iteratively to continuously improve the user experience.

Assortment Optimisation Platform — Web Application

- Designed a clean, user-friendly web application interface for a consumer goods optimisation tool enabling category managers to make data-driven decisions through intuitive visual workflows.
- Developed wireframes through to high-fidelity responsive designs; applied strong problem-solving skills and analytical to detail to reduce manual analysis effort by 35% and improve user efficiency by 25%.
- Maintained visual design consistency across multiple product screens and collaborated with the engineering team on design QA to ensure the final implementation matched the intended user interface.

Core Skills

Design Tools: Figma · Adobe XD · Canva · Miro · Notion · Loveable · Figma Make · FigJam

UI/UX Design: Wireframing · High-fidelity mockups · Interactive prototyping · Responsive design · Web interface design · Visual design · Design systems · Design Consistency · Edge Cases · Error States · WCAG · Design Thinking · Microinteractions

UX Process: Human-centred design · Design principles · User research · Usability testing · User flows · Information architecture · Journey mapping · Visual storytelling · Iterative design · AI Assisted Design · Interaction Design · Layout Design · Visual Design · Heuristics

Collaboration: Cross-functional collaboration · Design-to-engineering handoff · Design QA Collaboration · Stakeholder communication · Independent and team-based working · HTML (Vibe Coding) · CSS (Vibe Coding) · B2B SaaS platform · Enterprise tools · Business Workflows · Agile/Scrum · Workflow · Data heavy high dense dashboard

Experience

MathCo

UI / UX Designer	Dec 2024 – May 2026
- Designed 15+ visually appealing, user-friendly interfaces for web applications across CPG, Healthcare, Retail, and Information Management, owning the full UI/UX process from wireframes to high-fidelity shipped product. - Developed wireframes, prototypes, and high-fidelity designs using Figma; applied responsive design principles to ensure consistent, quality experiences across web platforms. Worked in Agile/sprint-based delivery cycles, participating in sprint planning and iterating on designs based on stakeholder and engineering feedback. Being part of end to end design process and having ownership of it. - Conducted user research and usability testing with stakeholders and end users, synthesised findings into clear design decisions developed user flows, IA and interaction patterns for data-driven products and iterated continuously to improve overall user satisfaction. - Collaborated with cross-functional teams (PM, engineering, business) to ensure design consistency and quality; led design QA before launch to verify implementation fidelity across all platforms. - Leveraged AI tools including ChatGPT, Claude, Gemini, and Figma Make to accelerate research synthesis, design exploration, prototyping, and stakeholder communication. Leveraged analytical thinking and data interpretation to identify usability challenges and improve user experiences.	
Product Solutioning / UX Strategy	Apr 2024 – Nov 2024
Translated user needs, business objectives, and technical constraints into scalable UX strategies and product experiences. UX frameworks and interactive Figma prototypes used for enterprise pitches, worked independently and as part of a team to align user needs with business requirements.	

- Created solution decks and product demonstrations using Canva and Figma that helped convert multiple client engagements into active projects; collaborated with business and engineering to define MVP scope.

Data Analyst	Oct 2023 – Mar 2024
Performed data analysis to support forecasting accuracy — developed strong analytical problem-solving skills that directly inform data-driven, user-centric design decisions across web and mobile interfaces.	

Education & Certifications

IBM Generative AI for UI UX Design Specialization — Coursera	2026
Google UX Design Professional Certificate — Coursera	2023
B.Tech, Computer Science and Technology — SRM Institute of Science and Technology	2019 – 2023
